THE ITALIAN STYLE DOOR

Dierre
YOUR HOME, YOUR LIFE

C L A S S I C H E

UN COLORE NON È MAI UGUALE A SE STESSO

Le porte Dierre possono anche essere personalizzate (a seconda del modello) con i colori RAL e NCS.

La cartella colori RAL è una scala normalizzata molto utilizzata in ambito produttivo, soprattutto nel settore delle finiture e delle vernici. È stata creata nel 1925 dal Reichsausschuss für Lieferbedingungen e i codici RAL sono composti da 4 cifre, raggruppati per migliaia in base alla famiglia di colori.

NCS (Natural Colour System®) è un sistema logico di ordinamento dei colori che si basa sul modo in cui questi sono percepiti ed è riconosciuto in campo internazionale come il linguaggio universale dei colori perché aiuta i professionisti del colore in tutto il mondo, con un linguaggio univoco che non lascia spazio a errori di comunicazione. Per mezzo del Sistema cromatico NCS, infatti, ogni possibile colore di superficie può essere descritto ed identificato con uno speciale codice (Notazione NCS).

Il Sistema NCS si fonda sui sei colori elementari e non associabili a livello percettivo ad alcun altro colore: bianco (W), nero (S), giallo (Y), rosso (R), blu (B) e verde (G). Le notazioni dei colori NCS si basano sulla somiglianza con questi sei colori elementari.

Il sistema RAL cataloga un insieme arbitrario e ristretto di sfumature ben definite e standardizzate, quello NCS invece fornisce un codice in grado di identificare univocamente i 10 milioni di tinte che l'occhio umano è in grado di percepire.

A COLOUR NEVER FULLY RESEMBLES ITSELF.

The Dierre doors can also be customized (depending on the model) with RAL and NCS colours.

The RAL colour card is a normalized scale very used in manufacturing, especially in the field of finishes and paints. It was created in 1925 by Reichsausschuss für Lieferbedingungen and the RAL codes are composed of 4 digits, grouped by thousands based on the colour group.

NCS (Natural Color System®) is a logical colour ordering system based on the way these are perceived and is internationally recognized as the universal language of colours as it helps colour professionals worldwide use a unique language that leaves no room for communication errors. In fact, by means of the NCS chromatic system every possible surface colour can be described and identified through a special code (NCS notation). The NCS System is based on the six elementary colours and cannot be associated to the perceptive level to any other colour: white (W), black (S), yellow (Y), red (R), blue (B) and green (G). The NCS colour notations are based on the similarity with these six elementary colours.

The RAL system orders an arbitrary and narrow set of well-defined and standardised shades, the NCS instead provides a code able to univocally identify the 10 million colours that the human eye is able to perceive.

Le informazioni presenti in questo catalogo possono subire variazioni.

The information contained in this catalogue may undergo variations.

The materials shown are a bare example: for the verification of colours please refer to the sample collection.

C L A S S I C H E

Le Classiche Dierre propongono una fresca rivisitazione delle porte per interni tradizionali con struttura in tamburato e rivestimento in MDF. Otto classici Dierre ridisegnati nei motivi e nelle colorazioni, dalle pulite linee geometriche delle Forte di gusto contemporaneo, fino ai sofisticati intagli delle Bonaparte, in perfetto stile impero. Classiche nate per durare nel tempo, grazie alla laccatura delle ante e dei telai, realizzata con strati sovrapposti di vernice poliuretanica che garantisce un'altissima resistenza meccanica contro l'abrasione e protegge dall'attacco della maggior parte degli agenti liquidi. Una gamma disponibile con tre diversi telai: piatto, tondo e rasé.

The Dierre Classical doors propose a fresh innovation of traditional doors for interiors with hollow structure and MDF veneering. Eight classic Dierre products redesigned in their patterns and colours, from the neat geometric lines of the contemporary style Forte family, up to the sophisticated carvings of the Bonaparte family having a perfect Empire style. Classic and conceived to last in time, thanks to the lacquering of the leaves and frames, made with superimposed layers of polyurethane varnish that ensures high mechanical resistance against abrasion and protects from the attack of most liquid agents. A range available with three different frames: flat, round and flush.

AMERICA

America 2 versione frassinata non liscia laccata bianco con maniglia mod. Elle
America 2 non-smooth ash version lacquered white with Elle model handle

AMERICA

L'effetto materico degli intagli delle bugne classiche in finitura tipo frassino è amplificato dalla venatura che restituisce l'emozione del legno massello. Un vero classico contemporaneo anche nella versione liscia.

The material effect of the carvings of classical raised panels in an ash-type finishing is amplified by the grained finish that gives back the emotion of solid wood. A true contemporary classic also in the smooth version.

Il telaio listellare e il coprifilo multistrato garantiscono una elevata resistenza all'umidità. I coprifili da 9 cm con alette telescopiche da 3 cm compensano perfettamente gli spessori parete fuorimisura e garantiscono la stessa altezza sia sul lato a spingere sia su quello a tirare. L'anta è montata sul telaio assemblato: questo sistema garantisce una veloce posa in opera e permette di evitare errori di misure e di registro della porta.

The 9 cm casing with 3 cm flap perfectly compensate any uneven wall dimensions and guarantee the same height both on the push and pull side. The wing is mounted on the frame: this assembly system ensures quick installation and allows to avoid errors in the measurement and adjustment of the door.

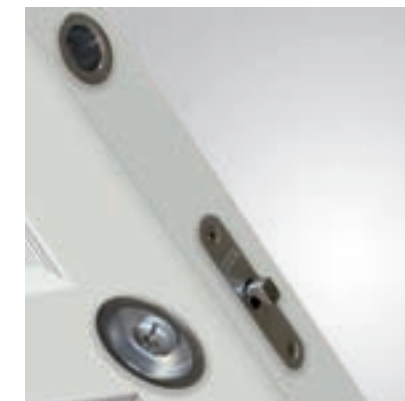

Serratura magnetica. Lo scrocco indipendente dal magnete permette sempre la chiusura della porta. Incontro sul telaio di tipo registrabile che agevola la fase di posa in opera.

Magnetic lock. The latch is independent from the magnet and always allows the closing of the door. Adjustable frame striker that aids the fitting stages.

Serratura libero/occupato minimale della versione scorrevole Minimal lock of the sliding version

Cerniera di tipo Anuba registrabile su 3 assi 3 axle adjustable hinge

Sigillo di autenticità Authenticity seal

LUCCHINI

La Lucchini è una porta dal disegno deciso e di carattere che si abbina idealmente con gli ambienti ibridi ed eclettici, dove gli stili si uniscono senza annullarsi e dove classico e moderno si fondono in insolite armonie.

Lucchini is a door having a decisive pattern and character that ideally matches with hybrid and eclectic environments, where styles overlap without disappearing and where classic and modern blend together in unusual harmonies.
